Art Unit: 1764

DETAILED ACTION

Specification

The specification is objected to because the phrase "this application is a divisional of Application No. 09/495,801, filed on February 1, 2000, now Patent No. 6,375,831" should appear as the first sentence of the description. Correction is required.

The disclosure is objected to because of the present specification does not support claims 6-10. Appropriate correction is required.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-5 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-5 of prior U.S. Patent No. 6,375,831. This is a double patenting rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1764

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6, 7, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Hirota et al. (6,805,135).

Hirota discloses a method of cleaning conduits by using a cleaning composition comprising 2-butoxyethanol and heterocyclic nitrogenous compound (referred as NMP hereinafter). The ratio of NMP to 2-butoxyethanol is about .75 to .95 and the total content of NMP and 2-butoxyethanol in the solution is about 80-90%. (See abstract; col. 2, line 35 through col. 4, line 47).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1764

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hirota et al. (6,805,135).

Hirota does not disclose the amount cleaning solution that is used in the process.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Hirota by using the claimed amount of cleaning solution because one of skill in the art would use any amount of the cleaning solution, which is effective to remove deposits, including the claimed amount with the expectation that the claimed amount would be effective as any other amount.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hirota et al. (6,805,135) in view of Roman et al. (3,088,916)

Hirota does not disclose that the heterocyclic nitrogenous compound is quinoline.

Roman discloses a cleaning composition comprising quinoline. (See col. 1, lines 9-14)

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Hirota by using a cleaning composition comprising quinoline as taught by Roman because one of skill in the art would use any

Art Unit: 1764

heterocyclic nitrogenous compound including quinoline because such compound is effective in

the cleaning process.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Tam M. Nguyen whose telephone number is (571) 272-1452.

The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
